PROFILE

I'm a passionate Frontend Developer who loves building clean, responsive, and user-friendly web interfaces. Some of my favorite projects include a Netflix Clone (HTML & CSS) and Skill Navigator, a self-built platform using HTML, CSS, JavaScript, and JSON that helps students explore the right learning paths. I have hands-on experience with HTML, CSS, JavaScript, Bootstrap, and I'm currently advancing my skills in React.js to develop modern, dynamic, and interactive web applications. I also enjoy exploring AI tools to automate repetitive tasks and improve workflow efficiency. My goal is to continuously learn, grow, and create digital experiences that truly make an impact.

EDUCATION

🎓 B.Tech in Computer Engineering
Bhagwan Mahavir University,
Surat (2022 – Present)
Current CGPA: 7.69 / 10

- CANVA

LANGUAGE

HINDI

ENGLISH

PROJECT

➤ Skill Navigator

A web app built with HTML, CSS, JavaScript, and JSON, using the MindElixir.js library to generate interactive skill roadmaps. Users can search for a skill to view its roadmap and get YouTube video suggestions to focus and enhance their learning. Integrated with Firebase for user login and signup to provide a personalized experience.

➤ Amazon Clone

A front-end project built with HTML and CSS that recreates the layout and design of Amazon's homepage. It includes a responsive header, product grid, and footer section to practice real-world e-commerce UI styling.

➤ Fitlab

Developed a responsive homepage using React.js showcasing gym details, branch locations, and image galleries with a clean and modern UI.
